PROFESIONAL PROFILE

Passionate Software Engineer. I stand out for my ability to work collaboratively, my proactivity, and my self-taught learning skills. I am constantly motivated to expand my knowledge and improve my skills, preparing myself for a promising future in the field of technology. My experience encompasses a wide range of programming languages, including PHP, Python, Java, C#, C++, CSS, and JavaScript. Additionally, I am familiar with ReactJS, VueJS and have used frameworks such as Node.js, Laravel, Django, .NET and WordPress. I also possess strong knowledge in backend development with databases like MySQL, SQL, Sqlite, MongoDB and PostgreSql, also I used cloud environment with GCP and AWS, finally I also have experience with docker.

WORK EXPERIENCE

Full Stack Software Engineer

Commandlink

2023-2024

- Work with team of developers in the development of backend and frontend solutions for the system that belongs to the company.
- I had to work with the docker tool to manage the Mysql database images and the main site image, also Github was used as version control. And the site is deployed on AWS.
- Develop bug fixes and create new backend and frontend features, using reactjs and php with Yii framework.
- I managed to meet the sprint dates by demonstrating my progress using the scrum methodology.

Full Stack Developer

2022-2023

Dspro

- Work with the team of software engineers in the development from scratch of Web applications for clients, using different stacks and different tools.
- For the development from scratch I used the Docker tool for database and site management, I also got experience in Google Cloud Platform and AWS.
- Among the stacks that I worked mainly on was Php with its framework Laravel and Mysql as a database, I also managed Python in the backend with Django, withs Sqlite and ReacJS, finally the last stack I worked on was Java using SpringBoot, with mongo DB, creating an API's for a clients.
- Use CI/CD for each of the projects we work on, creating continuous iterations to manage and meet client deadlines, using tools such as Jira and Slack.
- I managed to increase the amount of projects that the company could handle since I was able to be in two projects simultaneously as well as meet the expectations of the clients due to the process that is carried out with them in the development of the website.

Lead Software Engineer - Full Stack Developer

2020-2022

Studios23

- As a lead I have been responsible for planning, executing and testing the projects and leading a team of 5 Software Developers. Also I have to develop Web applications in blockchain with javascript, web3 and reactjs.
- I had a direct relationship with customers and accompany them in the process of creating the Web Application.
- As a Full Stack developer I had to create responsive sites with diferents stacks as C# with framwork .NET, SQL and bootstrap, also Full stack aplications with php, Mysql, and in the Frontend with VueJS.
- I Develop Smarts contracts with solidity to web3 Applications, Also I work and payment API's as Paypal API or Binance API, among others...
- I had experience in CRM as a Magento and Wordpress, creating templates and made bug fixes.
